# THE LIGHTSTREAM ADVANTAGE

Building a secure and interconnected cloud and networking foundation to support constant innovation is complex. Making it simple is our specialty.

Lightstream works alongside the world's leading technology and telecommunications companies and provides value to our customers through unique engineering, project management and service-oriented solutions. Our expertise lies in on-premise and Cloud convergence complexities, including network integration, cloud migration, security, and system monitoring, all supported through 24/7 managed services.

OUR CAPABILITIES		
CLOUD	CONNECTIVITY	SECURITY
We work with you to understand your business goals and analyze, plan, blueprint and implement optimal solutions to minimize costs and maximize business impact.	Our partnerships are leveraged to your advantage so connectivity solutions such as SD-WAN, broadband, dedicated internet, and MPLS are expertly implemented.	Through continuous oversight, automated controls and regular reviews, we assure your cloud and connectivity solutions are always ready, secure and driving business forward.

Curiosity to solve the complex drives us

We live in the age of constant business transformation. The Cloud, Big Data, AI and the Internet-of-Things open limitless possibilities. Maximizing opportunities requires amazing strategy and execution of integrated technologies—all networked to provide greater visibility, predictability and cognition.

Fortunately, we've envisioned this day coming for a while.

We've addressed enterprise complexities both on-premise and in-the-cloud. We've offered solutions that drive business transformation. And we've worked to find more ways to help you meet higher expectations.

OUR SERVICES

Network Managed	Cloud Managed	Security Managed	Professional
Network availability • Firewall, routers, switches, WAP • 24x7x365 support nocaas, • Monitoring • Carrier management & Escalations **Efficiency** • Dedicated csm's • Fanatical customer service **Technology** • Right tech to accelerate business • Best practices/review • Architecture **Financial** • Address network sprawl • Maximize value for spend. • Align spend to business needs	**Financial** • Managed reserved instances • Saving programs • Financial reviews • Advanced reporting & dashboards **Operational** • Reliability assessment • Performance efficiency **Technical** • Modern iaas • Modern paas • Best practices **Security optimization** • Identify, understand, act **Ongoing intelligent services**	**Zero trust framework** • Manage less, innovate more • Manage mobile access • Intelligent cloud migration • Mitigate risk **Edge defense** • Firewalls on premise **Endpoint defense** • Devices outside DC **Cloud defense** • Manage posture • Manage workloads **Access defense** • SASE cloud delivered model • Manage connectivity transactions	**Cloud foundation** • Design • Architecture • Deployment • Ongoing management • Cloud adoption framework **Security** • Assessment • Siem • Compliance • Remediation **Hybrid cloud connectivity** • Multi-cloud configuration • Expressroute/ direct connect • Regulated industries **Cloud migration** • Assessment • Mobilization • Modernization • Best practices

We are Lightstream.

Our passion to serve customers and our curiosity to solve the complex drives us. We listen to and work with you to carve a path where vision and execution intersect—enabling new capabilities, driving efficiency, and spurring innovation and growth.

Because when you work with a partner who helps you understand where you can go and how to get there, complexity can be averted and every possibility can be realized. That's where we live—and that's where we're ready to take you.

Complexity Averted. Possibilities Realized. 📞 **877-955-4448 (877-95-LIGHT)**
