LIGHTSTREAM CONNECT

A HOLISTIC VIEW OF YOUR CLOUD SECURITY AND MANAGEMENT
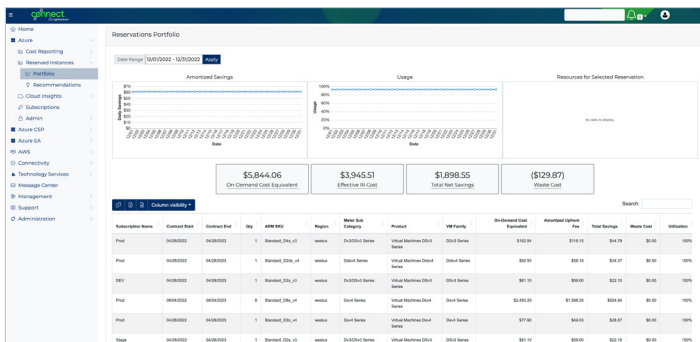

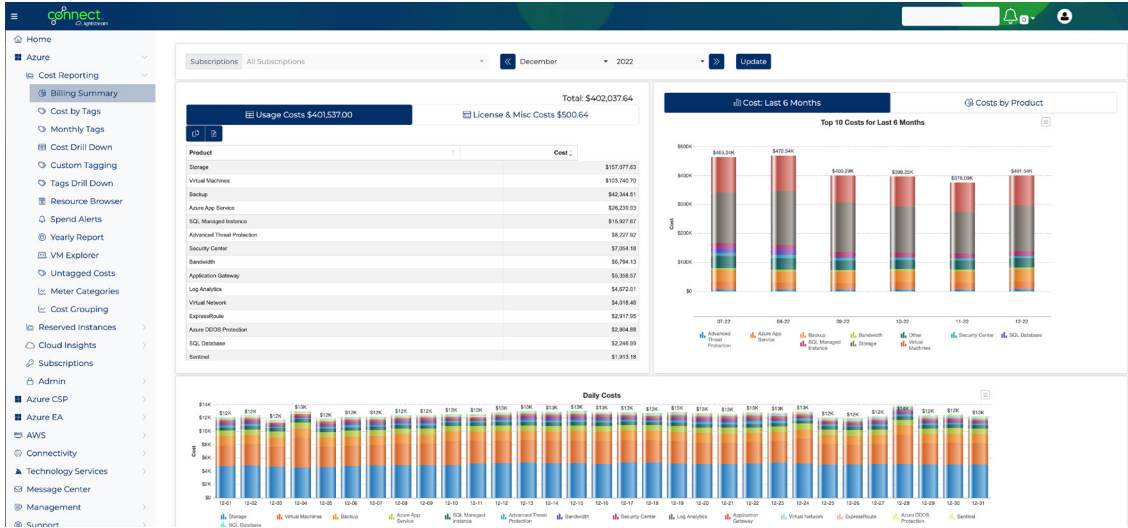

Lightstream Connect

You have to keep track of bills, technologies, security issues, and so much more, so we've brought everything you need to know about your technology spend and daily operations into one place—no more opening multiple spreadsheets and bills, just everything you need, all in one place. Lightstream Connect is a single pane of glass application for your entire network.

Because we want to help you optimize your cloud spend to the fullest, when you use Lightstream CMS, you get Lightstream Connect, too. It is a managed service that gives you a holistic view of your technology spend and network, integrating seamlessly (and securely) with telecom carriers, cloud providers, and our service management platform.

We consolidate your orders, services inventory, usage, and analytics into Lightstream Connect to help you save money and get the actionable insights you need. It offers:

- Network and cloud monitoring provide constant workload monitoring, especially when you're shifting cloud services, to ensure uptime through visibility and network connectivity.
- Advanced cloud analytics. Up-to-the-minute dashboards and cloud services reporting keep you in the loop, allowing you to view reports your way to make informed decisions for your cloud spend.
- Custom ad hoc reporting. We build custom reports based on your specific requirements— all included with Lightstream CMS and Lightstream Connect.

Lightstream Connect's comprehensive financial analytics (product costing, margin analytics, departmental reporting, and more) give you a billing overview and the spend clarity you need to make data-driven decisions on how to be more cost-effective. The data and reporting are updated frequently and consistently, ensuring accuracy.
