THE PRISMA CLOUD SECURITY ACCELERATOR: 5 STEP APPROACH

Follow us on

Let us tell you more about the amazing things we do.

LIGHTSTREAM'S 5 STEP APPROACH TO PUBLIC CLOUD SECURITY

Are you looking to establish and operationalize your security in the public cloud? The Prisma Cloud is a cloud-native security platform that provides comprehensive cloud security from a single solution. At Lightstream, we use the Prisma Cloud Security Accelerator to deliver unmatched security using our simple 5-step methodology.

① Manage Growth

Our team works alongside clients to deploy, configure, and build cloud security posture practices and guardrails. These ensure a secure initial setup and ongoing security in the public cloud. Our subject matter experts educate, train, and mentor organizations like yours to provide operational experience and maximize your investment. We help you align practices with your organizational objectives.

If you want a more hands-off approach, our Infrastructure as Code experts can create automated deployment templates to guide you and your team so you can deploy on your own.

② Use Our Roadmap to Success

We help ensure a secure cloud environment by providing you with professional services covering implementation, configuration, and initial remediation for your Prisma Cloud. This simple roadmap outlines our process:

- **Define**. Define your role-based access requirements.
- **Configure**. Choose what you want to see or mitigate existing controls. We also make sure you have compliance reporting in place.
- **Baseline**. Align your security policies to your current security posture.
- **Compliance mapping**. Map policies to compliance standards and expected security guardrails.
- **Alert mitigation**. Review and analyze alerts from the past seven days.
- **Integrate**. Integrate with your existing tools for alerts and tracking.

③ Let Us Mentor You

To ensure you get the most out of working with us, we work with you to build and tailor your cloud security strategy. We give you all the tools you need to train your teams, but we also act as a mentor, helping ensure your success.

We are happy to meet with our clients bi-weekly to:

- Provide product operational reviews
- Offer expert guidance on configuration, compliance, and customization of your cloud security
- Ensure your security objectives align with best practices
- Review your product releases

④ Automate Infrastructure Provisioning Through Code

Minimize human error and supercharge your efficiency by automating your infrastructure provisioning using code. By automating your infrastructure provisioning, you can boost efficiency through your entire development pipelines and increase stability and availability by ensuring a consistent environment.

Our team works alongside organizations to automate provisioning and reduce the risk of vulnerabilities that are often introduced through human error.

⑤ Explore Prisma Cloud Security Managed Services

Whether you're a small team with no bandwidth to constantly monitor and manage cloud security, or you want expert advice, Lightstream is here to help. With our managed services, you will receive:

- 24/7/365 monitoring, alerts, security operations, and incident handling through the Prisma Cloud Security Accelerator
- Continuous security and compliance scanning and reporting
- Expert analysis, validation, and explanation of findings
- Continuous cloud intrusion and attack monitoring
- Advisory services to identify and remediate systemic issues
- Expert security support to resolve open issues

Get Started Today

Let Lightstream and Prisma Cloud Security Accelerator strengthen and protect your security in the public cloud. Our simple 5-step methodology outlines a roadmap and helps you configure and deploy securely. We provide continual monitoring, advisory, and remediation services along the way to ensure your organization is safe and secure in the cloud.

Curiosity to solve the complex drives us

We live in the age of constant business transformation.

The Cloud, Big Data, AI and the Internet-of-Things open limitless possibilities—and even more expectations.

And with those expectations comes unfathomable complexity. Addressing them requires amazing strategy and execution of integrated technologies—all networked to provide greater visibility, predictability and cognition.

Fortunately, we've envisioned this day coming for a while.

We've addressed enterprise complexities of on-premise, in-the-cloud, and all the networks in between. We've offered solutions that drive business transformation. And we've worked to find more ways to help you meet higher expectations.

We are Lightstream.

Our passion to serve customers and our curiosity to solve the complex drives us.

We listen to and work with you to carve a path where vision and execution intersect—enabling new capabilities, driving efficiency, and spurring innovation and growth.

Because when you work with a partner who helps you understand where you can go and how to get there, complexity can be averted and every possibility can be realized.

That's where we live—and that's where we're ready to take you.

Complexity Averted. Possibilities Realized.

We've helped many public and private organizations to establish and implement a Zero Trust approach, both before and after the adoption of remote and hybrid work schedules. For a one-on-one consultation to discuss how to ensure your cloud is secure, contact us now.
