LIGHTSTREAM
RAPID RISK PROFILE

A LOW-TOUCH, LOW-RISK CLOUD SECURITY ASSESSMENT

The Lightstream Rapid Risk Profile is a low-touch, low-risk assessment that supports up to three production accounts across up to three public cloud platforms.

The assessment quickly evaluates the security threats associated with your account, identity & access management, logging, networking, storage and monitoring. The engagement provides a compliance summary report of your environment against the Center for Internet Security (CIS) Critical Security Controls (CSC) framework. Additionally, our security team will also review the findings with you through the lens of two additional industry standard security frameworks or regulatory compliance controls such as CSA CCM, NIST, ISO, Mitre ATT&CK, SOC 2, PCI-DSS, HIPAA, HITRUST, CMMC, and GDPR.

Connect, Protect and Optimize

No matter where you do business, our services platform and team of highly trained cloud, security and networking experts will help you to effectively balance risk and business outcomes. Our Rapid Risk Profile is the first step in helping you better understand and meet your key business objectives.
