

RETAIL CLOUD SECURITY WITH PRISMA CLOUD

A LOW-TOUCH, LOW-RISK CLOUD SECURITY ASSESSMENT

The Lightstream Rapid Risk Profile is a low-touch, low-risk assessment that supports up to three production accounts across up to three public cloud platforms.

The assessment quickly evaluates the security threats associated with your account, identity & access management, logging, networking, storage and monitoring. The engagement provides a compliance summary report of your environment against the Center for Internet Security (CIS) Critical Security Controls (CSC) framework. Additionally, our security team will also review the findings with you through the lens of two additional industry standard security frameworks or regulatory compliance controls such as CSA CCM, NIST, ISO, Mitre ATT&CK, SOC 2, PCI-DSS, HIPAA, HITRUST, CMMC, and GDPR.

Connect, Protect and Optimize

No matter where you do business, our services platform and team of highly trained cloud, security and networking experts will help you to effectively balance risk and business outcomes. Our Rapid Risk Profile is the first step in helping you better understand and meet your key business objectives.

Connect Assets

Protect What Matters

Improve and Optimize

What is in Scope

- Identity & Access Management
- Logging
- Networking
- Storage
- Monitoring

What We Provide

- Written Report on Key Cloud-Risk Indicators
- CIS CSC based Compliance Summary Report
- Feedback on security best practices for frameworks like CSA, CIS, NIST, ISO, and Mitre ATT&CK
- Feedback on regulatory compliance for frameworks like PCI-DSS, SOC 2, and GDPR

Why Choose Us?

- Multiple Palo Alto Partner Awards
- Prisma Cloud Launch Partner
- Palo Alto Certified Pro Services Partner
- Multiple CYBERFORCE Team Members
- Palo Alto Cloud Specialized Partner
- Certified Expertise for AWS / Azure
- Microsoft Gold Cloud / Security Partner
- AWS Security Competency

Get Started Today

The Lightstream Rapid Risk Profile data gathering efforts can be completed in a single one-hour remote meeting with our security team. All access to your environment is performed by you. Lightstream has no access to your data during or after the analysis session. To get started, [contact us](#).

Essential Retail Cloud Security

When done securely, adopting cloud environments can help retail businesses respond to opportunities quickly, scale effortlessly, improve efficiencies, and deliver an exceptional customer experience.

How do you ensure you have a comprehensive overview of your cloud environment, where vulnerabilities or misconfigurations are mitigated and resource configurations aren't drifting out of compliance with policies?

Visibility is the answer.

You have visibility when you can see everything across all resources and accounts so you can implement granular policies and reduce risk. Prisma™ Cloud by Palo Alto Networks continuously monitors your cloud environment and reports on resource misconfigurations, compliance violations, network security risks, and anomalies.

Prisma Cloud is the industry's most comprehensive threat protection and compliance assurance platform. Powered entirely by APIs with seamless integrations across your cloud environments, threat intelligence, and remediation tools, only Prisma Cloud delivers a truly integrated, frictionless experience, no agents or proxies.

Let us tell you more about the amazing things we do.
