Auto Group

Handling the complexity of securing a multi-cloud environment, Lightstream gives the company a modern security solution that allows it to gain complete visibility and control over all its cloud resources and prevents additional spend on unnecessary technology.

Business Problems

- This company needed a sophisticated security solution that could detect and prevent threats across its complex multi-cloud environment.
- Unique security requirements for each native application made consistent workload protection a challenge.
- New leadership needed guidance to understand the status of the company's cloud security including measures in place and unaddressed, looming risks.
- Visibility concerns regarding current capabilities prompted the company to source new technology at an additional cost.

Solutions

- Lightstream's team of experts configured a full scope solution and educated the company as to what it had in terms of security, what it could utilize, and what it needed to address. This prevented unnecessary spend on additional tech they didn't need.

- Lightstream protected this company across all its cloud resources with Prisma Cloud Security Posture Management.

- Lightstream quickly deployed Prisma Cloud Workload Protection to provide an automated security approach protecting applications from unwanted activity and threats.

Business Outcomes

- Lightstream quickly deployed secure cloud infrastructure while maximizing the value of the company's Prisma usage and minimizing disruptions in business operations.

- Continuous monitoring of the company's workspaces, will help minimize, if not avoid, security breaches.

- Life cycle management will monitor and address new instances as well possible abandoned instances in need of new security patches.
