

# Healthcare Solutions Company

Working with Lightstream, the company identified and remediated several key security vulnerabilities, technically optimized applications, improved compliance, and cut more than one-third of cloud infrastructure costs.

We also helped the company align its cloud infrastructure to support its aggressive growth plans into the future.

## Business Challenge

- Day-to-day administration of AWS and Azure
- Excessive cloud usage costs
- Lack of expertise around security
- Compliance visibility and remediation

## Solution

Cloud managed services, including:

- Reserved instance tagging and management
- Compliance
- Cloud log intelligence
- Configuration and changes
- User permission
- Cloud perimeter

## Business Outcomes

Within two months:

- Improved compliance by 26% across 35 standards, including PCI, DDS HIPAA, NIST 800-53, NIST 800-171, SOC2, and more
- Applications rightsized
- Cloud spend reduced by 35%

“ In only a few months, Lightstream helped us identify and remediate several security vulnerabilities, improve compliance by 26%, technically rightsize applications and cut our cloud spend by 35%.”
