

Azure Core Security Assessment

Bolster Your Cloud Security

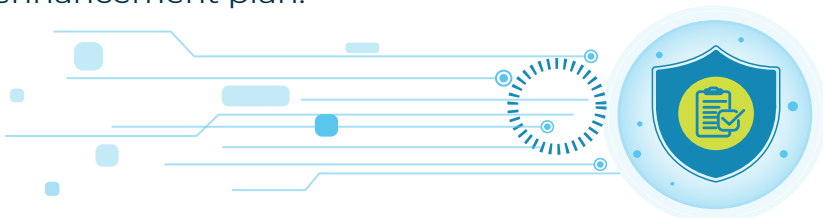

In today's rapidly changing threat landscape, cloud security is a must. Lightstream has your back with the Microsoft Multi-Cloud (AWS & GCP) Security Assessment to safeguard your Azure and other cloud deployments

Our Assessment

Focused on your Azure and multi-cloud environments, we uncover vulnerabilities, evaluate security controls, and provide actionable recommendations.

Azure Security Report

Get an Azure or multi-cloud Security Score report. It assesses your cloud's health, measures the ratio of healthy resources to total resources, and enables the development of a comprehensive security enhancement plan.

Key Benefits:

Vulnerability Check:

- Assess your Azure and multi-cloud environment to spot weaknesses.

Security Control Audit:

- Evaluate controls and highlight gaps.

Threat Detection and Response:

- Ensure your VMs can handle incidents.

Identity and Access Mastery:

- Tighten Azure AD security.

Data Protection and Compliance:

- Ensure data protection and compliance.

Actionable Roadmap:

- Get recommendations for better security.

Energize Your Cloud Environments with Lightstream:

Activate Microsoft Defender & Purview for Cloud to tackle vulnerabilities and threats.

Why Lightstream:

With us, you'll fortify your security, mitigate risks, and stay ahead of evolving threats.

Secure Your Azure Cloud & Multi-Cloud with Confidence:

Proactively enhance your cloud security with Lightstream. Connect with us today.
